Summary

Technical leader in Apple's Developer Relations org with a background spanning frontend development, UX, and e-commerce. Currently driving developer experience initiatives, from building internal AI tools to leading design system migrations across multiple apps. Known for bridging design and engineering, shaping product direction through cross-functional collaboration, and translating complex technical work into accessible experiences for developers.

Education

DePaul University, Chicago, IL - 2012 - 2016

Business Major with Marketing concentration, Minor Digital Cinema | GPA: 3.7/4.0

Relevant Work Experience

Apple – Worldwide Developer Relations (WWDR), Cupertino, CA

Senior Interactive Developer

May 2021 – Present

- Designed and built interfaces for developer.apple.com, supporting high-visibility cross-functional launches.
- Built accessible, performant UI using HTML, SCSS, and JavaScript within Apple's design system.
- Led SCSS design system migration across apps and support pages at Apple, managing impacts and dependencies.
- Developed frontend for an internal LLM tool supporting WWDC content discovery and team workflows.
- Partnered with product, design, and content teams to shape strategy and align technical direction.
- Created internal tools and layout systems to streamline content publishing and improve design consistency.

Carhartt – Outerwear Apparel Company, Detroit, MI

UX Designer / Developer

May 2019 – February 2020

- Designed wireframes for unique e-commerce experiences and helped execute them into production code.
- Created reusable frontend content following existing brand guidelines while utilizing the BEM CSS methodology.
- Demonstrated ability to take mockups and translate them to pixel-perfect recreations in HTML5, CSS, and JavaScript.
- Tested content against browsers, operating systems, and devices to ensure consistent and accessible experiences.
- Exhibited intrapreneur traits while working on an agile team launching a new product within an established brand.

Flashtalking – Ad Serving, Measuring and Technology Company, Chicago, IL

Publisher Certification Specialist

October 2016 – October 2017

- Certified major publishers including NBC and Apple News for ad serving with JS, HTML5, CSS, and video standards.
- Created HTML5, VAST, and VPAID ads to publisher's unique specifications and verified pixel tracking on placements.
- Handled technical communication and led calls with leading publishers, DSPs, ad networks, and measurement partners.
- Tested ad placements across mobile, tablet, and desktop fixing bugs or issues against publishing website's code stack.
